SUMMARY

Over 3 years of working in the field of Blockchain Technology, I have successfully led cross-functional teams in implementing revolutionary solutions. My steadfast dedication to ensuring client satisfaction has enabled me to effortlessly translate and develop requirements into technical specifications.

EXPERIENCE

Technical Architect

Blockchain Council

December 2022 - Present, Pune, India

- Successfully led the migration of the entire assessment platform to ProProfs, collaborating with both the Technical Team and clients to ensure a smooth transition and enhanced functionality.
- Effectively coordinated over 50 Instructor-Led-Training (ILT) sessions, showcasing strong collaboration with the instructor and the Technical for seamless knowledge transfer.
- Designed and implemented 2 Blockchain courses, orchestrating the creation of multiple courses in partnership with SMEs and clients for effective knowledge transfer and skill development.
- Proficiently trained AI models using meticulously gathered data and seamlessly integrated them into the Chatbot, augmenting its capabilities and elevating user interactions.

Blockchain Developer Intern

CogniTensor

March 2022 - September 2022, Mumbai, India

- Developed a cryptocurrency data retrieval system in React.js, leveraging API integration to fetch real-time information and enhance user experience seamlessly.
- Engineered a decentralized financial application, implementing cutting-edge technologies to ensure secure and efficient transactions within the financial sectors.
- Developed a Candlestick graph for cryptocurrency using Chart.js, integrating interactive visualization features to represent market trends and price fluctuations.

Web Developer Intern

White Oak

January 2020 - March 2020, Mumbai, India

- Successfully designed, developed, and launched 5 fully functional websites using React.js, JavaScript, Bootstrap, HTML, and CSS, showcasing proficiency in front-end development.
- Administered and optimized database, ensuring seamless data management and troubleshooting to maintain optimal system performance.
- Improved the UI/UX websites via a responsive front-end using JavaScript, HTML, and CSS.

PROJECTS

Cryptocurrency Tracker

June 2022 - September 2022

- Developed a React.JS based cryptocurrency tracker app with a responsive Material UI for an intuitive user interface.
- Integrated Chart JS to offer 24-hour, 30-day, and 3-month cryptocurrency charts, enhancing user insights.
- Utilized APIs to fetch live data, providing real-time cryptocurrency information, including rank, price, and market cap, with currency conversion options in dollars and rupees.

Blockchain Transaction App

August 2021 - February 2022

- Created a high-tech Blockchain Cryptocurrency App using React.js, Python, and Vite for a robust and modern technology stack.
- Integrated Metamask and Web 3.0 to ensure secure and reliable cryptocurrency transactions within the application.
- Implemented a visually appealing frontend with Bootstrap4, including a unique feature that stores transactions as dynamic GIFs, enhancing user engagement.

EDUCATION

Bachelors of Science in Business Computing in Information System

Minor in Blockchain • University of Central Lancashire • Preston, UK • 2022 • 3.7

Bachelor of Arts in English Literature

University of Mumbai • Mumbai, India • 2023 • 4.0

CERTIFICATIONS

Certified Ethical Hacker

EC-Council • 2019

Solidity Development

Udemy • 2021

NFT Development

Udemy • 2020

Certified Blockchain Expert

Blockchain Council • 2023

Certified Blockchain Architect

Blockchain Council • 2023

Certified ChatGPT Expert

Blockchain Council • 2024

SKILLS

Language: Python, SQL, Solidity.

Web development: JavaScript, NodeJS, React, HTML, CSS, Bootstrap4, Figma. **Database:**

MySQL, AWS.

Development environment: IntelliJ IDEA, Microsoft Visual Studio, Sublime Text.

Core Competencies: Project Management, Decision Making, Leadership, Innovations, Effective Communication, Problem-Solving, Analytics Abilities, Service-focused.
